As a woman, I always have a desire to be noticed by others. In order to achieve this objective, I can spend hours in front of the mirror to get my appearance right. And this means making sure everything from top to bottom including my shoes is perfect. I do have a sense of what footwear to put on based on my outfit, even if I say so myself. For example, If it's winter, I'd wear a pair of knee-length leather boots that keep my legs covered and compliment my coat, be able to walk on snow for long distances easily without my feet hurting or blistering. So where am I going with this? I am simply trying to help you find the perfect pair of boots like I have.

It's Winter Again!

A staple in most women's fall and winter footwear wardrobes, boots are very much "in" fashion this year. Typically, winter boots are made with leather on the outside and soft, luxurious sheepskin lining to ensure that your feet stay warm even under extreme cold conditions. If you consider yourself a style diva, then winter boots are your ultimate style statement in comfort, warmth, and chicness. Of course, you must be ready to pay for it all!

Boots are really trendy and there is wide choice from flat-heels to stilettos, wedges, and platforms, boots are everything in between. Don't believe me? Just head over to the "downtown" areas of any well-populated city in America or hop to the nearest mall, to find almost every other woman flaunting her boots in colors as varied as black, brown, silver, gold, and many others!

The Hottest Boots In Cold Winter

Now for the season's winner! Yes, the hottest boots this season are the flat and riding boots. And if you already have a pair of heeled boots, don't sweat! Pick up a pair of flat boots and you'll have double the joy and choice for mixing things up and making your own fashion statement!

An easy way to check out and shop for boots is to order them online. The range is latest in styles, colors, materials and the experience is fun and tempting. But, you may want to actually visit a store and try out the boots you like before buying them. What's the point in spending all that money on a pair of shoes that don't fit you? Sigh!

Finding boots that fit you perfectly, while giving you enough toe room, can be a little difficult because of the varying calf and ankle sizes in women. Boots that are too tight in the calves are highly uncomfortable, while those which are loose look terribly sloppy. If you are keen on buying boots online, then visit an online seller. Also check if the online store offers you free shipping and free returns just in case you need to return the boots for a better fitting pair. You may also check if the online as well as the malls offer you custom fits by sizing them as per your individual shoe size.

Getting Boot-ylicious!

Now that you know how to find that perfect pair of boots, its time to choose one or all of the many boot styles that are doing the rounds this winter.

Black patent leather boots are very much in vogue. For all you sassy ladies, a pair of knee-high boots is just the thing to make the guys drool! Accessorize the boots with a pair of fishnet stockings.
