Article Body:

Anyone who rides a motorcycle knows the importance of a good pair of motorcycle sunglasses. You need to have protection for your eyes from the glare of the sun, but more importantly you need exceptional motorcycle sunglasses so that you can see where you are going as well as the traffic in front of you.

There are certain features that make one style of sunglasses the best motorcycle sunglasses. Of course, the best style in motorcycle sun glasses is really up to the individual, but there are common features you should look for. When you want the best in motorcycle sunglasses, you have to look for those with shatterproof lenses. When you ride a motorcycle, the likelihood of small bits of debris hitting you in the face is very high. Therefore you need sunglasses that are hard to break.

Most of the lenses in motorcycle sunglasses are made of polycarbonate, which makes them stronger than ordinary lenses. You also need the best motorcycle sunglasses with a UV 400 filter to protect your eyesight. Another important feature to look for in motorcycle sun glasses is that they provide you with the ultimate protection from the wind. These sun glasses really need to be a snug fit so that nothing can in around the glasses.

If you look at photos of motorcycle sunglasses, you will see they are smaller than the usual sunglasses. This is because they need to fit tight on the nose and around the eyes. Because of this necessary feature, motorcycle sun glasses need to be lightweight. The best motorcycle sunglasses are made of nylon and metal for a better fit and comfort. However, some motorcycle riders prefer to have all metal frames in their sun glasses because they know they are durable.

When choosing motorcycle sunglasses, you also need a vented frame. Because the

sunglasses are tight to your face, they will fog up if there are no vents to let air circulate. To make the sun glasses as comfortable as possible while you're riding a motorcycle some designers have added foam on the ear pieces and foam padding around the frame. Although some riders wear helmets with tinted face masks, during the hot, sunny days of the summer you want to feel the warm wind on your face. The motorcycle sun glasses make the thrill of the ride that much more enjoyable.

Motorcycle sunglasses need to be tough as well as high quality.
